

# Walk4 Water4

Your **Walk** Can Quench Thirst

## This crisis is real.

**3.86 BILLION**  
people alive today don't have  
access to safe water at home.

**3.4 MILLION**  
The global water crisis claims  
3.4 million lives per year, more  
than all forms of violence,  
including war.

**2-3 HOURS**  
Women and children without  
access to safe water spend 2-3  
hours every day walking to  
collect water.

**50 LBS**  
A bucket of water weighs  
nearly 50 lbs.

## Your walk can end it.

You can reimagine a world  
where every home, school,  
and clinic can have safe water,  
always.

A world free from waterborne  
illness. A world where healthy  
children have time to go to  
school and to play. A world  
where families have hope for  
the future. A world where  
possibilities are limitless.

Join groups around the world in  
walking to end the walk. Help  
reimagine a world where the  
water crisis is history!
